

# 3D VISUALISATION

## CREATING VIRTUAL WORLDS!

Visual Communications has produced architectural fly through's of interior shops or exhibitions designs, these animations are a very cost effective way of presenting your ideas to your team or your client before the costly build takes place! Once the 'computer model' is built, we can view the animation from any level or angle you desire.

*"Imagination is more important than knowledge."*

ALBERT EINSTEIN

Working with one of our clients, we produce animated, interactive 'roof layers' - the brief for this complex project could only be answered through animation!

***The skies the limit - let your imagination run wild.***

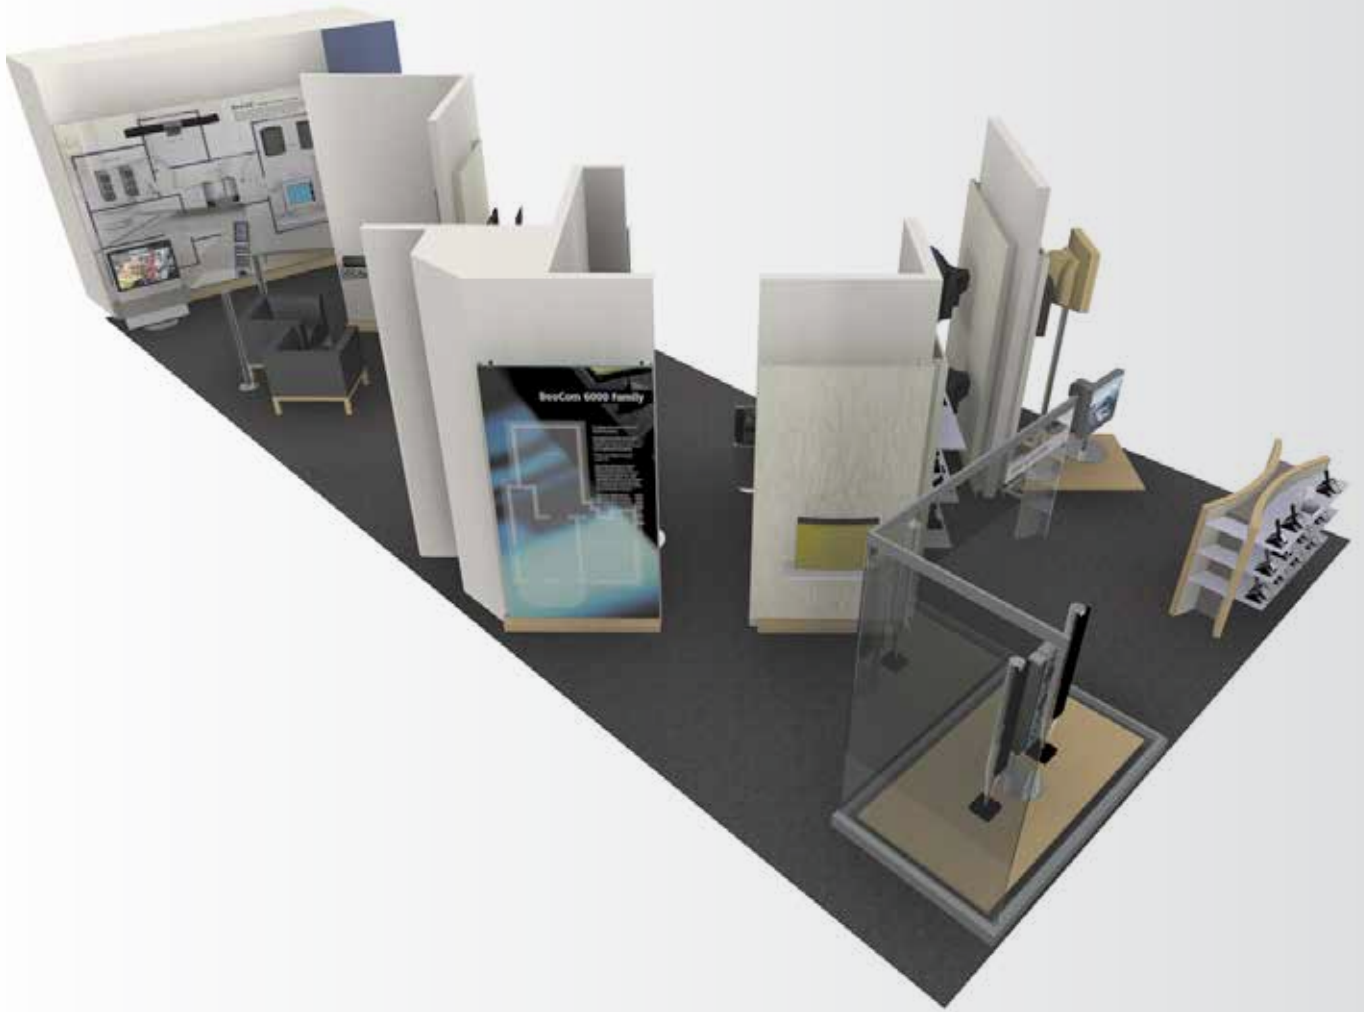

*Innovative Strategic Thinking*
